

Introducing intelligent lectern systems convenience

Diepmaat 16, NL-9431MP Westerbork The Netherlands, info@intelligentlecterns.com www.intelligentlecterns.com

ILS develops out-of-the-box presentation solutions for conducting seminars, lectures, meetings and conferences. The systems add productivity and professionalism to any event. ILS' new technology is the result of many years of experience in servicing the international pro-AV markets (in display technology, the development of simulation and training software, and gaming) and world-class design of Graphical User Interfaces.

Presenters today use tools such as Microsoft PowerPoint for visual support of their speeches. Using advanced technology in meetings and conferences frequently causes disruptions due to different system settings, synchronisation difficulties with projectors and exposure to cluttered desktops. ILS eliminates all these disruptions.

Productivity and Professionalism are the key parameters to ILS presentation solutions.

Intelligent Lectern Systems:

- Use very simple intuitive means to realize a professionally conducted event
- Minimize errors and eliminate error-prone use of presentation technology
- Contribute to improvement and retention of presentations
- Improve the presenter's confidence and perceived authority
- Provide compact industry standard solutions
- Provide good long term support, and lower production cost
- Reduce cost of custom built lecterns
- Help avoid meetings exceeding their scheduled time

ILS coined the concept of the intelligent lectern, and defined it as a lectern with integrated PC and large touch screen combined with an intuitive user interface to control multiple PowerPoint presentations. The presenter gets to view more information on the screen than is visible to the audience. An appliance-like intelligent lectern often includes simple switching capability for external devices to access the projector, extended and cloned dual display modes, and it also includes wiring for a cardioid condenser microphone.

Hardware

ILS creates and distributes a wide range of digital lecterns with integrated large touch screens and modern PC power. ILS offers compact floor standing models, different options for style and function, and screens with pen- and/or easy finger touch interaction. Apart from the pedestal and cabinet based models there are portable lectern systems for table top use, and lectern integration modules with the same functionality for mounting in wooden lecterns and podiums as specified by architects. ILS is a unique company offering the widest and most complete set of presentation systems.

Visit www.intelligentlecterns.com for up-to-date information.

Software

Sho-Q Seminar Planner and Presentation Delivery Support System is specially developed for intelligent lecterns with large touch screens for quick and easy control. Sho-Q is a completely intuitive interface to present PowerPoint files, with very advanced features:

- Control multiple presentations from within the application allows for fast presenter changes and seamless continuity
- The presenter sees the current, next and previous slide, as well as slide notes and a timer
- Context-sensitive controls appear only when they are needed, they let the presenter easily control embedded media, animations and staged slides
- Set up an entire seminar with different presenters within a single sho-Q file, start each presentation with one touch
- Automatic inclusion of presentations on inserted USB-sticks and their proper deletion upon removal of the stick.

- Sho-Q Presenter system for instant delivery of multiple Powerpoint presentations
- 1 year module exchange warranty, extensible to 3 full years including software updates
- Meets CE, UL, FCC certifications, RoHS compliance. Packaged in plywood crate
- A minimized delivery charge ex works Netherlands is added to its sharp price

ILS19 Mark II Presenter lectern with pen-interactive monitor

- ADA Compliant Lectern with electronically controlled hydraulic lifts for height adjustment;
- HP High-end Computer; External DVD and Player software
- 19" Interactive Screen with Stylus Pen
- Gooseneck Microphone; Microphone & Audio system Controls
- Dual VGA card for extended presentation mode
- Laptop Docking Port
- USB connections
- Keyboard and mouse.

Optionally with 21" interactive monitor and solid floor plate
Choice of wood coloured panels

The ILS core product family catalogue: Formal lecterns

ILS 21RL Sho-Q Presentation Productivity Console

Comfortable 20" wide screen touch monitor with latest PC package on sleek but solid floor-standing solution. Lift height adjustment includes cable management. Comfortable grips, decoupled XLR mic socket and lighting over DIN A4 / A-size area next to the monitor.

Combined with sho-Q presenter support tools, the system adds confidence to the user - and productivity to meetings - with seamless execution of multiple presentations.

Includes Core2Duo PC, Intel m/b, 2GB, 80GB HDD,
XP Pro or VISTA Front access: 3 USB, 1 Firewire,
DVD, multi-card reader
Top: electrical height control switch, reading light switch
XLR3 microphone socket, XLR4 Littlite socket
Monitor: 20" wide screen resistive touch
Output: XLR3, PC audio jack, LAN, DVI-D
Optional output: VGA sub15

ILS 21RT: portable tabletop lectern version

ILS 22G Sho-Q-box Lectern System

Our top model ILS 22G represents a series of very advanced all-in-one presentation solutions. The very versatile 1.5" – 3" flat package consists of a touch glass lectern top, high performance industrial grade board PC and 22" wide monitor with control functions around the display.

Specifications: Front DVD slot, 4 USB.
Internal: Core2Duo T5500 80GB HDD
I/O: DVI-I, 3x RS232, 10x relays, LAN hub
MiniXLR3, MiniXLR4, PC Audio
Controls: on/off projector, lights, touch, audio level,
microphone mute/adjust, display mirror/span,
shortcuts to sho-Q, desktop, jump any other defined
functions, and more...

All technology you want from a lectern is implemented in this 65 x 50 x 4 – 7 cm – a large pizza box – package. Drop in, or integrate on, any wooden custom designed lectern or podium, or lay it on the table as a portable lectern. You can also buy it with the ILS electrical lift pedestal, or its SpeakerCorner cabinet, for a complete solution.

The ILS 22G makes use of ground-braking multi-frame direct touch technology that uses multiple sensors to control both the touch screen driven software and selective back-lit touch fields for keyboard and mouse, for annotation, room and source control and direct PC control functions – all from a single glass plate. Function dependent lighting.

Includes 2 XLR microphone mounts on top, one of which is pre-amplified. This is a 3" thick package, with all intelligence needed in a lectern. It can drop into any lectern or podium, thus fitting architects and customer styling needs. Custom glass touch frames possible. System integrators add value by programming the touch control functions to adapt the system to the client needs.

ILS 22G for integration purposes

ILS 22GL mounted on ILS's beautiful wide range electrical pillar and foot

ILS 22GT on table feet as portable unit

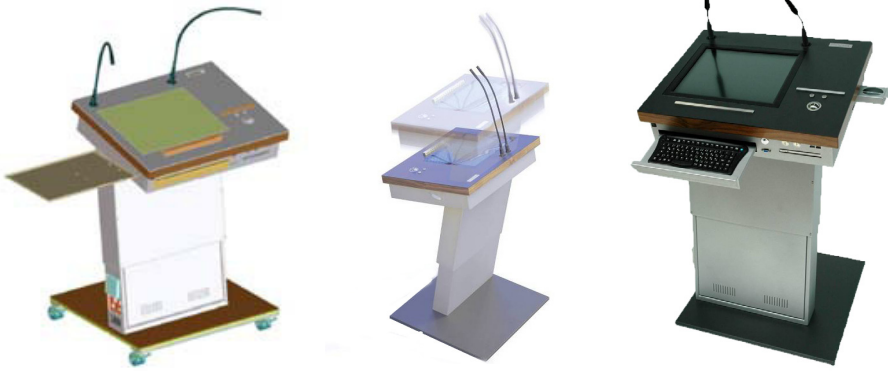

ILS 24G includes SpeakersCorner cabinet with 4-way and 2-way EXTRON switchers that are controlled from the ILS 22G glass plate, USB & LAN hub, full 19" rack inside lockable cabinet, wing tablets come pre-wired for notebooks/camera.

Alternative Lectern Solutions:

ILS17S Lectern Concept:One

Solid and beautifully styled with level integrated 17" SAW touch screen with toughened glass. Includes pull-out keyboard, trackball, pre-wiring for 2 microphones.

VGA input switch for external notebook, generous 40 cm range electrical height adjustment
Industrial Digital Engine micro PC with Core2Duo 2GHz, DVD, XP Pro or Vista
Paint colour options. Sho-Q.
Touch and go!
Options: wheel kit, notebook tray

ILS17PS: PenLectern Concept:One

Same style ADA-compliant lectern with smoothly integrated SMART Sympodium ID370 interactive pen display.

- 76 – 116 cm wide range height adjustment

ILS 20S Digilectern

Unique lectern and kiosk. This product is specially designed for use in conference venues, business centres and hotels. If not in use as a lectern, the ILS20S can double as an interactive kiosk. Your own logo is cut into the stainless steel!

Generous electrical height adjustment, switch for external notebook and tray, cup holder and built-in lighting. The big 20.1" touch display uses the "surface acoustic wave" principle for optimal feedback when touching and full display brightness in both positions. The ILS display manager assures that the image is adapted whether lectern or kiosk and maintains touch calibration. Comes with Sho-Q.

Includes Core2Duo PC, Intel m/b, 2GB, 80GB HDD, 4 USB, DVD, XP Pro or VISTA. Paint color options

ILS20SL: Includes electrical wide range height adjustment with kiosk conversion mode

ILS20SL: Includes electrical wide range height adjustment without kiosk mode

ILS20SF: Fixed height lectern

ILS20SC dual use system converts between lectern and interactive kiosk

Desktop presentation solutions – Portability – Flexibility

ILS 15RT Tabletop Presenter

This is our most economical package to present productively and professionally with sho-Q software.

Resistive touch PC integrated 3GHz Dual Core power.
DVD, 4 USB, 2 Firewire, SD card reader, PC audio I/O, VGA out,
