

ILS is building the highest quality lecterns around with perfect logo engravings in the front of any ILS system. For dynamic environments, ILS offers a perfectly integrated front monitor of 32" with media player to announce speakers and show event or corporate logos. With it comes lockable storage that allows direct access to 3 half rack devices. The PC may be there or in the top.

The front display system is available on **ILS Synergy AW, SW, GW, QW**.

The intelligent **ILS Synergy QW** comes with generous height adjustment to comfortably operate and present from the 24" touch monitor with an integrated PC in the top. Casing and pedestal are all made of thick machined aluminium profiles, blocks and plates to last a lifetime and beyond.

The wide top is divided in 2 areas: left the interactive 24" monitor mounted flush inside the top surface, to the right an area for notes or have a touch control panel installed, for which we support all major brands with up to 10" displays.

Of course, the system comes with laptop connectivity for which there are 4 user definable Neutrik Style sockets available, it comes with charging features for any tablet or smart phone to use e.g. a timer app; one or two microphone shock-mounts, a reading light and an optional mute button feature.

For mobility, the system comes on lockable casters, default 50mmØ for hard floors, or 75mmØ for thick carpets to facilitate moving the lectern around.

#### DIMENSIONS

<b>Width</b>	<b>Top:</b> 1030 mm x 545 mm <b>Side Plate:</b> 430 mm x 295 mm <b>Top + Side Plate:</b> 1430 mm
<b>Height</b>	<b>User side:</b> min: 950 mm max: 1350 mm <b>Audience Side:</b> min: 1075 mm max: 1475 mm
<b>Weight</b>	110 kg
