

The ILS14PA is the first in a series of cost-effective well-designed multimedia classroom lecterns. You only need to add your own PC, everything else that is needed in a lectern is included: 19" 4:3, or 20 inch wide screen pen monitor, 120 watt amplifier, gooseneck and wireless microphones, notebook interface panel. There also is an integrated controller for external devices, and devices that are added inside the 19 inch rack bay. Its modest price may be its most impressive feature!

Product Specifications

- solid, completely lockable lectern with internal 19" rack, 80 cm tall space and keyboard tray
- ergonomic use of electric tilt-adjustable 20" tablet monitor with pen and pen support software
- extensive equipment control system, pre-programmed with 7" touch control panel on top

- 1 year module exchange warranty extensible to 3 full years including software updates
- Meets CE, UL, FCC certifications, RoHS compliance. Packaged in plywood crate

Optional:

- We will integrate your specified PC and XP or VISTA OS, MS Office, drivers and sho-Q [PC, keyboard and mouse are not included in the base product]
- Control programming can simply be done by the user, but will be offered remotely by ILS
- A teacher desk style version with the same components is also available on request
- Add a visualizer/document camera, XGA resolution, live & image store, automatic image correction, USB connection
- ILS will liaise with your appointed AV system integrator to generate a quote if you decide to have the installation performed by your AV supplier
- room-Q central system for remote on-line operation and monitoring, teacher assistance, alarm etc.

Interactive ILS14 lectern control system.

2x2 VGA switcher, audio and USB switchers, 3x 2 Video switcher, 2x microphone in, 2 RS232 COM ports. LAN hub, 1 power socket switch, 2 up/down switches for projection screen, lift, 4 auxiliary relay switches, 3 IR control outputs.

Use sho-Q on PC with dual VGA outputs to make a complete presentation and teaching solution.

Sho-Q

Sho-Q makes presentation delivery simple, efficient and comfortable:

- Control multiple presentations from within the application makes fast presenter changes and seamless continuity
- View the current slide, next and previous slide, slide notes and a timer simultaneously
- Context-sensitive user interface appear when needed to control embedded media, animations and staged slides
- Set up an entire seminar of different presenters within a single sho-Q structure for a one-touch start of each presentation
- Automatic inclusion of presentations brought on USB-sticks and its proper deletion when removed.
- VISTA/Aero and Windows7 users benefit from a live view window, image zoom and annotation features.
