ILS 22G Sho-Q-box Lectern System

A revolutionary presentation appliance that suits board meetings, press conferences, seminars, lectures and formal speaking events.

Improve your presentation delivery with ease and confidence.

The ILS22G with sho-Q Presenter is so intuitive to use, that no operator training is required. Just bring your presentation on a USB stick, plug it in, and you are ready to go.

The ILS 22G module represents a complete technology package for presentation solutions. It is a stylish all-in-one presentation console in versatile 1.5" – 3" flat box, with 22" monitor plus surrounding room and source controls, keyboard and annotation pad, engraved in a 31" touch glass cover. There is no bezel around the glass. The durable 5mm thick aluminum packaging comes with XLR3 and XLR5 microphone sockets.

ILS 22GT

Control multiple Powerpoint presentations with a single touch, jump between slides of all presentations in seconds for meeting productivity.

The presenter is supported with context sensitive controls for his presentation, only the buttons that are needed are visible. This concept is also applied to the selective backlight control of the buttons surrounding the monitor.

The ILS22G console mounts on any user-designed lectern cabinet, on the ILS provided Powerlift pedestal (ILS22GL), on its ILS24G SpeakersCorner 19" rack based cabinet with monitor-tilt, or it comes with tabletop portable solutions (ILS22GT).

Specifications:

Front: DVD slot, 4 USB.

Internal: Core2Duo CPU.

I/O: DVI-I, 3x RS232, 8x relays (in RJ45, DIN5, audio jack), 3x internal relays, 2xLAN, MiniXLR3, MiniXLR4, PC Audio.

Controls: on/off projector, lights, touch, audio level, microphone mute/adjust, 4-way switcher source control, display mirror/span switcher control.

Shortcuts: to sho-Q, annotation, desktop and a jump to user-defined functions.

Optional: Shure gooseneck with condenser mic cartridge and pre-amp on XLR5 socket.

The ILS 22G makes use of ground-braking multi-frame direct touch technology. It uses multiple sensors to control both the touch screen driven software, and the selective back-lit touch fields for keyboard and mouse – all from a single glass plate.

ILS 22GL

Better for presenters, better for the audience

Diepmaat 16, NL-9431MP Westerbork The Netherlands, info@intelligentlecterns.com www.intelligentlecterns.com

ILS 24G SpeakersCorner.

The ILS22G lectern module is integrated on a cabinet that includes a 19" rack inside. Beautiful workmanship in a pillar style pre-wired lectern. Swiss design, German manufacturing.

The viewing angle on the console can be adjusted from almost level to a 40° angle for comfortable viewing and interacting. The touch glass includes control of the integrated 4-way and 2-way Extron switchers; switch to additional notebooks/visualizer while maintaining seamless image to the audience.

The 19" bay allows integration of audio amplification and additional sources. This may include additional computing for heavy applications such as a complete virtual studio mixer for mixing presentation data with video and camera sources, forming a single high resolution data stream for distance learning and remote attendance applications.

ILS24G

Present comfortably using sho-Q presenter, consider the upgrade to the ILS Mix&Stream solutions.

Sho-Q

Sho-Q makes presentation delivery simple, efficient and comfortable:

- Control multiple presentations from within the application makes fast presenter changes and seamless continuity
- View the current slide, next and previous slide, slide notes and a timer simultaneously
- Context-sensitive user interface appear when needed to control embedded media, animations and staged slides
- Set up an entire seminar of different presenters within a single sho-Q structure for a one-touch start of each presentation
- Automatic inclusion of presentations brought on USB-sticks and its proper deletion when removed.
